

HopeLine Assistant – Add 'Powered by Treasure Coast AI' Footer

Instructions for Replit:

1. Open client/src/components/ChatWindow.tsx
2. Locate the message input container (<div className='chat-input-container'>).
3. Directly AFTER that container, insert this JSX:

```
<div className='powered-footer'>
  <span>Powered by </span>
  <strong>Treasure Coast AI</strong>
</div>
```

4. Add the following CSS to ChatWindow.css or global styles:

```
.powered-footer {
  width: 100%;
  text-align: center;
  font-size: 10px;
  padding: 4px 0 6px;
  color: #9ca3af;
  background: #ffffff;
  border-top: 1px solid #e5e7eb;
  user-select: none;
}

.powered-footer strong {
  font-weight: 600;
  color: #111827;
}
```

This will place a subtle, single-line footer directly under the typing box.
